High-performance and durable design

Buttonhole width adjustment

Added a new feature that allows you to adjust the buttonhole width in five steps, from 0.3mm to 1.5mm.

Sewing thick denim

Happy Box Feed, with its durable and precise 7-piece feed dogs, enables smooth and beautiful stitching even on thick materials such as denim hems.

--- since 1923-

ABOUT HappyJapan

Happy Japan Co., Ltd. is a manufacturer that has supported Japanese manufacturing, primarily through sewing machine production, for over 100 years since its founding in 1923.

Based at its head office factory in Yamagata, the company designs and manufactures a wide range of products in-house, from household sewing machines to industrial embroidery machines, FA equipment, and semiconductor-related equipment. Through its long-cultivated precision machining technology and thorough quality control, the company has earned the high trust of customers worldwide.

“Technology and Beyond”

Based on this philosophy, Happy Japan continues to challenge itself to create products that generate new value.

The spirit of “creating sewing machines that bring happiness,” which has been passed down since the company's founding, remains unchanged and is still alive in all of our products.

--- since 2001-

Happy Japan & sewing machine

Regarding sewing machines, we began casting and processing sewing machine parts in 1938, and started manufacturing and selling our own brand of sewing machines in 1945.

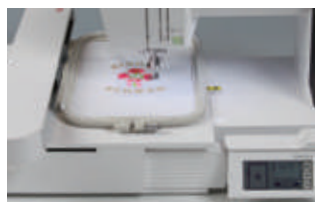

Since then, we have been selling the Singer brand domestically and conducting OEM production overseas. However, based on our belief in “providing customers with sewing machines that are fun and enjoyable to use,” we have finally begun manufacturing and selling a new brand of sewing machines under our own name starting in 2021.

--- since 20XX-

Other features

Notification lamp	Ready when the red light turns green, you can start sewing pressing the button.
Lock presser foot	Keep presser foot horizontally with a simple button operation, easy to sew even thick material.
One-touch slow button	The button drop sewing speed instantly.
LED lighting for sewing space	LED light illuminates working space around the needle.
Thread sensor	A safety device automatically stops machine if needle thread breaks or threading is not properly.
Needle up-down button	The needle moves up and down by the button, convenient for square stitch and single stitch.
Drop feed	This function drop the feed dog with a lever, moving the fabric freely, ideal for free motion quilting.
Free arm	Sew tubular items like sleeves, trousers, etc. Simply remove the detachable accessory box to access the free arm.
Lock button	Safety function which locks the machine, replacing needle/foot safely and easily.

NEW

EXP-9300

New features

Strengthening for sewing thick materials

By strengthening internal components and improving the control program, the machine can now sew thicker materials even more effectively, and the sewing speed has been increased to a maximum rotation speed of 900 rpm.

Silent design

The operating noise level has been reduced from previous models, resulting in quieter operation. Enjoy quiet and comfortable sewing.

Evolved buttonholes

Place the button in the presser foot, and a perfectly sized buttonhole will be created automatically. The buttonhole stitch width has been improved from a minimum of 3.5mm to 3.0mm, and the stitch length from a minimum of 0.3mm to 0.2mm. A new buttonhole width adjustment function has also been added.

Basic functions

EXP-9300

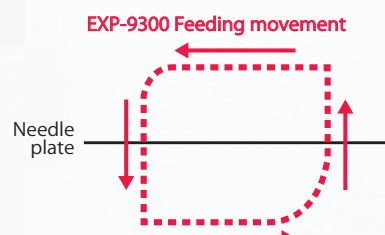

Happy one step needle threader

Thread up to the guide and lower the lever, get the thread through the eye of the needle. An excellent feature operated with one hand action. (*For household sewing machine needles 11 to 16)

Happy box feed

Ideal sewing function for thick, thin and elastic fabrics. By horizontal movement of the feed dog, the feed dog contacts fabrics longer time than current models, feeding thin or stretchable fabrics smoothly.

7 Piece feed dog

Reducing puckering of thin fabric. 7 piece feed dog reduces slipping and puckering.

LCD color touch screen

Simple and visible LCD color screen, easy and excellent operability by touch screen.

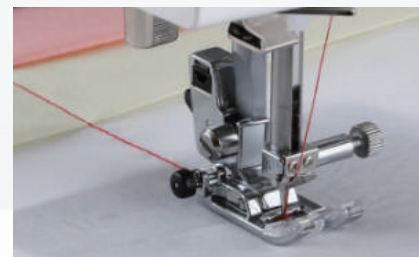

Foot pressure adjustment

The pressure of the presser foot can be adjusted from 5 levels according to the thickness of the fabric.

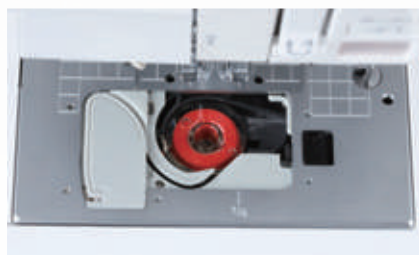

Computerized automatic thread tension

Adjust appropriate thread tension according to the pattern.

Easy bobbin threading

Just insert bobbin and follow the guide, it allows you to start sewing without pulling up bobbin thread.

Automatic thread cutter

Upper and bobbin thread are cut short automatically.

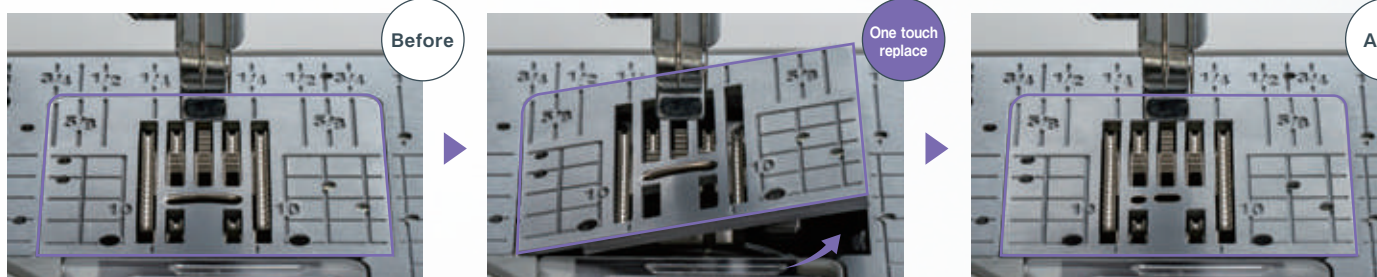

Easy bobbin winding

To set up the bobbin for winding, simply insert the bobbin to the shaft, wind the thread. The motor automatically stops when winding finish.

Quick change needle plate

Easy replacing the zigzag needle plate to straight needle plate.

Comfortable functions

Knee lifter

Raise / lower the presser foot.

Wide extension table

Wider space makes sewing for large works easily such as curtains and quilts.

Foot controller

Easy start and stop operation with your foot.

Smart accessory box

A convenient box store accessories inside the table.

Hard case

Hard case protects the machine from the dust.

Stitch pattern list (Total 476 types)
